

Lean Canvas for CampusConnect

02-Aug-2025
Iteration #1

Problem/Untapped Opportunity

Top 3 problems/opportunities

- 1. Exorbitant Fees:** Students lose up to 23% of their money on commissions and shipping on generic platforms.
- 2. Lack of Trust & Safety:** Transacting with anonymous, unverified users on platforms like Facebook Groups leads to scams and safety concerns.
- 3. Fragmented Experience:** Students must use multiple apps for buying goods, finding events, and connecting with peers, creating inefficiency.

Solution

A dual-purpose mobile app that provides:

- A **hyper-local marketplace** with low, transparent commissions (6.5%)
- A **social networking platform** for finding friends and study buddies
- Mandatory campus email verification** for all users to ensure a trusted community

Unique Value Proposition

Competitive Advantages

The only trusted campus-exclusive app that lets you safely buy, sell, and connect with fellow students—saving you money and eliminating the risk of dealing with strangers.

Unfair Advantage

- Founder-Market Fit:** Developed by a student who deeply understands the target audience's pain points
- Community-Based Trust:** Network effect of verified, high-trust community is difficult for generic platforms to replicate
- Hyper-Local Focus:** Deep integration into daily commercial and social fabric of each campus

Customer Segments

University Students in Turkey (18-25):

Students like "Ayşe," who are budget-conscious due to inflation, tech-savvy, socially motivated, and frustrated with high costs and low trust of current platforms.

Early Adopters: Students actively trying to save money, earn extra cash by selling used items, and looking for safer ways to connect with peers.

Cost Structure

Customer Acquisition costs
Distribution costs
Hosting
People, etc.

- Customer Acquisition Costs (CAC):** Marketing materials, ambassador incentives
- App Development & Hosting:** Server costs, maintenance, future developer salaries
- Personnel:** Founder's time, future marketing and support staff

Key Metrics

Key activities you measure

- User Acquisition Rate:** Target 1,000 users in first 6 months
- Monthly Active Users (MAU):** Target 20% of total users
- User Retention Rate:** Target 40% after 3 months
- Marketplace Liquidity:** Number of listings per user, average time to sell

Channels

Potential Partners, Collaborations

- On-campus physical marketing (posters, flyers)
- Student Ambassador programs
- Digital campus channels (university social media groups, student forums)
- Word-of-mouth within the trusted campus network

Revenue Streams

Revenue Model
Life Time Value
Revenue
Gross Margin

- Marketplace Commission:** A low, transparent fee (target 6.5%) on successful transactions
- Premium Subscriptions:** Monthly fees for enhanced social/dating features (advanced profile visibility, unlimited connections)
